

Environmental Management System (EMS):

- ⇒ Tool for monitoring and continually improving business process
- ⇒ Structured and ongoing approach to environmental management
- ⇒ Actions for prevention of environmental pollution before it occurs
- ⇒ Based on international standard ISO 14001
- ⇒ Defined responsibilities and best management practices!

“Plan-Do-Check-Act”

EMS is like a game.
You need training, you need a strategy, but most of all,
you need a team!

Rules = Each team member has to follow legal and other requirements to protect the environment!

Team/Court = The rules apply to all Garrison members on all installations! You are the key player!

Tactics = The EMS Policy is the basis of the EMS and states the Garrison's commitment to protect the environment!

Defense = USAG Schweinfurt meets all legal and other requirements and US Army goals!

Offense = USAG Schweinfurt proactively prevents pollution before it occurs!

Game Analysis = The Garrison assesses its performance and identifies those activities with the greatest impact on the environment

Score and Win = Stick to the rules, follow the strategy and help the Garrison to meet its objectives!

5 Significant Environmental Aspects and Objectives

1. Energy Consumption:

Reduce Consumption by 10% annually

2. Solid Waste Generation:

Increase Recycling Rate to 60%

3. Haz. Waste (HW) Generation:

Improve Management of HW

4. Spill/ Emergency Situation:

Improve Spill Prevention and Response Practices

5. Use/ Storage of POL:

Apply Best Management Practices

How can YOU be part of the team?

Think about the environmental effects of your day-to-day activities.

Try to:

Save energy and fuel,
Reduce waste generation,
Separate and recycle trash, and
Save water.

Stick to the rules

Use the recycling guide, check the Garrison webpage for energy and fuel saving tips, follow work procedures.

Engage and convince others

You can make a difference: Start environment friendly initiatives and encourage friends and family to join.
